

Kantin Apung Sekolah Sehat

<https://www.youtube.com/watch?v=9GZEAQtEdzU>

A. Listen to the extract from *Kantin Apung Sekolah Sehat* and fill in the blank spaces.

Di atas lahan kosong yang tergenang ____ inilah, kantin SMP Negeri 26 Surabaya berdiri. Konsep kantin _____ dan terbuka ini dibangun sejak tahun 2009. Dana pembangunannya, awalnya menggunakan dana sekolah, sponsorship dan masyarakat melalui komite _____ serta wali murid. Namun sejak tahun 2011, pembiayaan sepenuhnya oleh pemerintah _____ Surabaya.

Sistem pengelolaan kantin dibuat berbeda. Agar _____ tetap higienis, setiap siswa wajib melepas alas kaki. Penyimpanannya wajib menggunakan kemasan non-plastik dan dibawa sendiri-sendiri. Dengan metode ini tidak _____ ditemukan sepatu berserakan.

On the empty plot submerged in water, stands the canteen of SMP 26 Surabaya state school.

This concept of a green and open canteen started to be constructed in 2009.

The initial building funding used the school's budget, sponsorship and community fundraising through the school's committee and student representations. But since 2011 full funding was undertaken by the Surabaya government.

A unique canteen management system has been implemented. In order to maintain food hygiene, every student is required to take off their footwear. Each student is also required to bring their own non-plastic bag. This method avoids shoes scattered every where.

Selain ____ pembayarannya menggunakan kupon, mengajarkan siswa membayar terlebih dahulu. Untuk harga makanannya pun diseragamkan. Setiap _____ harganya 7000 rupiah per porsi, sedangkan _____ 3000 rupiah. Menyanya diupayakan _____ tanpa zat sintetis. Setiap makanannya pun dihitung takaran gizinya.

“Enak ya...ehm...makan sama anak SMP, sepantaran... yang pastipun makanan bergizi di sini tanpa lima P ya, pengawet, pewarna, pemutih, penyedap dan juga perasa...namun saya cobain...bener-bener enak...dan juga untuk minumannya juga... tanpa sedotan...hmm...”

Moreover, the payment uses coupons, which teaches students to pay in advance.

The food prices are also streamlined. Every food item portion cost 7000 rupiah, while drinks cost 3000 rupiah.

A healthy menu is intended without synthetic substance. The nutrition value of every food is also calculated.

So delicious...uhm....eating with SMP kids, my peers...what's for certain is the nutritious food here is without the five P yes, preservatives, colouring, whitening, taste and flavour enhancers...yet I taste it...it's really tasty...and also the drinks... are without straws...hmmm...

Sekali lagi, penggunaan plastik memang dihindari _____. Pengawasan standard dan kualitas makanan _____ dipantau oleh dinas kesehatan pemerintah kota Surabaya. Meskipun pedagang makanannya dari _____ sekolah, kualitas makanan tetap terjaga. (1:43)

To reiterate, the use of plastic is indeed avoided here. Quality and standard assurance are constantly inspected by Surabaya City health department. Even though the food sellers outsource their ingredients, the food quality is controlled.

B. From the text above, which words/phrases mean:

1. Submerged in water _____
2. Green and open canteen _____
3. School funds _____
4. City government _____
5. Management _____
6. Every student is required _____
7. Footwear _____
8. Teaching students _____
9. To pay _____
